

# COMPANY TESTIMONIAL

SCHAEFFER  
PRODUCTIQUE

## WHY CHOOSE eBIZ?

*"We chose eBIZ because it is a semantic language for exchange of data in the textile industry."*

*We needed to make a link between different IT systems, and faced the challenge of having to develop a new software every time in order to achieve our goal.*

*With eBIZ we can easily develop connections between companies and enjoy the benefits of mutualization of standards."*

## HOW DO YOU FORESEE THE EVOLUTION OF THE eBIZ PROJECT?

*"At the moment the eBIZ project pilots have developed about 30 links, which we believe will evolve into more than 100 in the future."*

*Via our platform EcolTex, we plan to create connections with more and more textile companies in Europe.*

*Companies are striving to become more performant with automatisisation, and often approach us to find out how to make these kinds of links between each other. They want to make the move into the industry 4.0."*

## About SCHAEFFER

French company SCHAEFFER PRODUCTIQUE is the European leader in the sector of specialized software for the textile industry, integrating the changing needs of the international textile industry with the latest advances in digital technologies.

The company developed the EcolTex software, a digital platform of services with a hub of data exchanges, which offers all the necessary tools for traceability and historisation. EcolTex uses the European eBIZ standard to manage a collaborative exchange structure, in order to reduce costs of IT developments.

Co-funded by the COSME programme  
of the European Union
