

eBIZ: interoperability solves planning

CARIAGGI

FINE YARNS COLLECTION

eBIZ is the European initiative supporting digital communications in the fashion industry. Since 2008, eBIZ enables companies to exchange orders and data between their systems or IT providers using **a common digital language**

Cariaggi: "beyond 99% of customer satisfaction thanks to our integrated supply chain"

The Cariaggi case

The Italian top quality yarn producer Cariaggi struggled with production planning because of lack of interoperability with its suppliers and subcontractors.

In 2013, Cariaggi and partners upgraded their software with an eBIZ compatible solution and achieved interoperability along the supply chain. This enabled flexible and continuous monitoring and rescheduling of the production process.

Remarkable results

Using the eBIZ based system, Cariaggi and its business partners have been achieved the following results:

- 100% cut down of fax exchanges for production orders and order changes
- 95% reduction of delivery dates not maintained and not timely notified
- 95% decrease of telephone calls and emails for rescheduling
- 30% cut of personnel costs for production planning and scheduling
- 25% efficiency gain in the production planning and control

How to use it?

eBIZ offers the free of charge Reference Architecture to the companies of the textile, clothing and footwear industry and their IT solution providers. The Architecture is an open source, technical guidance document enabling interoperability in the supply chain.
